For science stream, attention should be paid on research aptitude behind each theory so that a student can think himself how to design an experiment to establish something or to get an interpretation.

Even if they are in senior classes, this way must be adopted.	This can only happen in a class with a moderate or limited strength of students, and is extremely important because this way, students concentrate on studies more.	Do not simply give lecture or teach, ask students for their doubts and other questions.

Another point that I've observed is that some of the teachers mainly focus on completing the syllabus, rather than trying to get the concept clear and testing student's understanding over that concept	The quality of internal assignments should be improved. Further than just merely giving up a topic to write for specific word limit. I feel that the internals should be something like MCQ exams, survey and reports or based on any modern day problem.
