ABOUT GUSHKARA MAHAVIDYALAYA

Gushkara Mahavidyalaya was founded on the 9th of August, 1965. Gushkara, Galsi, Mangalkote, Ausgram and Bhatar constitute the catchment area of the college. By virtue of road and rail communications, a large number of students from such far-flung areas as Durgapur, Katwa, Memari, Bolpur and Bardhaman flock to the college for pursuing their studies leading to Bachelor's degree in various disciplines. The college also serves as the extended campus of Netaji Subhas Open University.

The district town of Burdwan is to the south of Gushkara which is flanked on the east by Bhatar and Mangalkote and on the west by Jangalmahal. Kunur, the major tributary of the river Ajay, flows through the town. Archaeological findings have established that human habitation in the area surrounding the confluence of Ajay and Kunur dates back to at least three thousand years.

CONFERENCE OVERVIEW

It gives us immense pleasure to cordially invite you to the International Conference on "Opportunities and Challenges in Biological Science and Sports Science" organised by Internal Quality Assurance Cell (IQAC), Gushkara Mahavidyalaya on March 5-6, 2023. The conference intends to provide an academic platform for academicians and students. It also aims to provide an arena for the enthusiasts from India and abroad to interchange new knowledge, expertise, ideas and recent research findings.

This International Conference has been designed to focus on various scientific trails covering major areas on Life Sciences & Sports Sciences; the exchange of ideas, thoughts, deliberations on part of eminent scientists, research scholars will address the real opportunities and challenges in relevant issues in these fields.

We cheerfully welcome all to their dynamic interests.

CONFERENCE NOTE

Biological Science is always engaging to solve the problems of human health, habitat as well as life. This field of science is intimately related with various other major fields/subjects like Physics (Biophysics), Chemistry (Biochemistry), Statistics (Biostatistics), Technology (Biotechnology), Computer Science (Bioinformatics, Computational Biology), Medical Science (Parasitology, Medical Microbiology, Histology, Physiology), Human History / Anthropology (Evolutionary Biology), Environmental Science, Wildlife Conservation etc. On the other hand, Sports Science includes several interconnected subjects/fields like Nutrition, Health and Disease, Strength and Conditioning, Sports Psychology, Sports injury Prevention, Functional Anatomy, Performance Analysis, Human Movements and Motivation. The diversified opportunities as well as the major challenges pertaining both the themes will be addressed in this International Conference for the improvement of life and livelihood of human and Biosphere in post post-modern era.
